Grand total for Manhattan and Bronx, 27,432 employes......

MEN ENOUGH TO MAKE A CITY OF 37,000 PEOPLE.

Though Here Are Tabulated No Employes Whose Positions Emanate from Other Elective Offices, Yet the Total Pay Roll Foots Up More Than \$32,000,000.

TO ACCOUNT FOR ALL, FIGURES MUST BE DOUBLED.

In None of the Outlying Towns Are the Departments of Police, Fire, Public Works, Health, Etc., Fully Developed, and Great Changes Must Be Made to Bring Them Up to Anything Like a Metropolitan Basis.

EARN here the stupendous patronas which the election of Tuesday las placed in the hands of Mayor Va

Three millions and a half of people mal up the population of the Greater New York. on the business of this monster commonalty under the new charter regulations.

Here, wrought out upon such absolute of Estimate and Apportionment." figures as the charter prescribes, and upon the basis of the forces hitherto found necessary to conduct the municipalities and towns which go to make up the second largest city in the world, is the approximute pay roll of the Greater New York municipal machinery.

The estimate given in this presen is much smaller, beyond all doubt, than the actual roster of the greater city's employes will prove to be when once the whole vast machinery shall have been set running at metropolitan speed.

There are city positions almost numberess which are not set down in these lists. for the reason that they do not grow ou of the appointive power vested in the There is a multitude of Legislative appointments, for instance; there are employes to be engaged in many works which have their origin in some other elective officer than the Mayor. They are none the less a part of the vast volume of patronage which Democratic victory placed in Democratic hands, and are to be borne in mind as altogether comprised in motto, "None but Democrats of

Scant as it is of the sum total of the city's patronage, a glance at this schedule will show that the number of Democrat

The total estimated amount of patronage in the Borough of Queens is \$1,575,110, but ship and Long Island City has a separate personal taxes. This bureau, under the system of offices. There are many offices old charter, includes: yet to be created. Others will be amalgamated, so it is not astonishing that there should be confusion. County Clerk Sutphen said yesterday that he was completely in the dark as to what would happen in his

'I have no idea what they will do and l don't think anybody else has. The charter leaves many points undefined and in many more instances leaves the questlo salary as much in the dark as the rest the proposition. I am getting gray try to solve the puzzle without the ald

That is the situation throughout the sections of the Greater City, and, in fa in the old ones as well. In the Borot of Richmond, as in that of Queens, the exists only a vague idea of the exten which that balliwick will be recognize the distribution of employment under Greater New York organization. Ri mond shares, too, the willingness of Queens and proclaims, holdly, if somewhat unnecessarily, that it will take all it can.

As yet no tangibly accurate schedule has been made of what the States Island Borough, or Queens either, will ask at the hands of the new administration. Time alone can give a clear idea of the measure of their yearning, or of the magnitude of their honest needs.

And over and above the normal increase in the general budget necessarily born of the increase of territory and population, it is certain that another wide margin, which it is impossible to calculate, must be al-lotted for the cierical and other work requisite to welding the boroughs into one. The Deputy Comptroller states that there has, besides, been since January 1 a natural shough but yet phenomenal increase in the number of vouchers issued and paid-from 40,000 to 52,000. It is likely that most of these are for positions not involving salaries of the first class.

These figures, and much of fact told here which cannot be reduced to tabular form, tell more convincingly than maps or narrative can do the vastness of this mighty

BOROUGH OF QUEENS. Total\$247,100

of Telegraph

aplece, Total \$39,600,

In organizing the Fire Department of Greater New York it is proposed to estab-lish uniformed departments in the outly-

ing boroughs, equipped and manned after

the manner of the metropolitan force. No

estimate has yet admittedly been made as

to the number of men who will be re-

quired for this purpose. It will certainly be enormous. The departments of Long

Island City and Brooklyn will doubtless be

maintained as at present constituted, sava that large extensions must needs be made.

The volunteer departments in the towns in

Richmond and Queens will be disbanded,

and it is provided in the charter that such

of the apparatus, horses, and so forth, now

owned by those departments, as may be found available for the uses of the uni-

formed force, shall be purchased from the

ships constituting these boroughs.

The water supply department is bound to become even more extensive and more portentous in the near future than it has ever been even since the comparative perfection of the Croton system. There is, as has been previously set forth

nothing in the act shall be construed as interfering with or vitiating any right or franchise at present held by any company. This clause, it has been made plain, is the cloak which, until the Journal told some months ago its story of the great Ramapo water project of Platt, Tracy, Dutcher, Evans and others, had never been suspected by the taxpayers. The scheme is to bring into New York

for consumption of the people of the five boroughs the water from 231,600 the Ramapo hills. The proximity 803,900 of this territory to the adjacent up-lands from which the supply of New Jersey is drawn by the water ring, which, headed by Garrett A. Hobart, Vice-President, controls that State, is shrewdly suggestive of a design above. establish a like regency over the greater city of New York, with 1 Water
